this second edition contains a collection of technical abbreviations acronyms and identifiers in short terms that are used in information and communication technologies and other related areas they have become part of the normal vocabulary in many industries institutes organizations and universities too often they are used without mentioning what they stand for the main area covered by this dictionary is information and communication technology ict this includes computer and communication hardware and software communication networks the internet and the world wide web and automatic control other areas covered are ict related techniques solutions products processes and activities the dictionary also contains symbolic names of organizations and institutions directly connected to the subjects listed above as well as the abbreviated names of conferences symposia workshops where the mentioned subject areas are treated in some cases the standard two letter country codes are listed between parenthesis at the end of every explained term and the country where the term originated this is a reference book that is important for all practitioners and users in the areas mentioned above technical publications often omit the meaning of terms and confront the reader with jargon too often difficult to understand readers can use this book as a complete reference guide without having to guess what the letters of the terms stand for this new edition contains close to 35 000 terms approximately ten thousand new items have been added obsolete and less relevant terms have been deleted

english language dictionary of acronyms and abbreviations used in management technology and information science

my first encounter with acronyms took place when i was ten years old and growing up in an occupied country during the second world war my father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the bbc all acronyms used in this introduction are listed in this dictionary to me the meaning of bbc was that we would receive different information about the war than we got from the usual censored broadcasts there was of course the well known acronym associated

with the nt but at that time i did not realize that it meant more than the postal service in those years a deteriorated service gradually the daily use of acronyms grew most of the newly acquired three and four letter abbreviations referred to organiza tions such as the broadcasting corporations in the netherlands and belgium and references to cowltries such as the usa ussr and uk when attending high school the hbs after the war my knowledge of acronyms grew slowly even during the ten years i spent in the dutch merchant marine the ghv the number of acronyms was limited to ad vanced equipment that eventually became known as radar loran and decca
